Greetings:

I was stunned to learn of NAB's petition 04-160 that will limit the local oriented programming on satellite radio.

Being in a very rural area, we benefit greatly from the variety and quality of programming on XM as other radio is extremely limited. We pay for this service to hear the news, and even to learn of traffic and weather in far away cities (my husband travels extensively for work and we need the information).

Besides, if we pay for services, why should the NAB decide what we should be able to hear?

So I ask that you would reject this petition that would limit programming that we need.

Sincerely,

Rebecca Renkert
